

PUNTA CANA (PUJ/MDPC)

Elevation 40ft

CATEGORY A

AV brief not required

GENERAL

- Punta Cana International Airport is located in Punta Cana, Dominican Republic. It is the second busiest in the Caribbean.
- Airfield situated on the East coast of the island on a flat area. Terrain starts to rise 18 nm to the West reaching 2500 ft AMSL approx 29 nm in a NW direction.
- Terrain rises to over 10000ft AMSL in the centre of the island (150nm W of airport)

Threats**Runway Excursion**

- High incidence of unstable/high-energy approaches

ARRIVAL**Diversion Airports**

SANTO DOMINGO	SDQ/MDSD	75 nm/263°T	CAT A
SAN JUAN	SJU/TJSJ	135 nm/093°T	CAT A
ANTIGUA	ANU/TAPA	386 nm/103°T	CAT B
KINGSTON	KIN/MKJP	518 nm/124°T	CAT B

APPROACH

- No ILS approaches
- A new Rwy 08/26 is now open north of Rwy 09/27. Ensure you line up with the correct runway.
- Rwy 08/26 preferred for landing

GROUND

- When landing Rwy 09: vacate A to allow departing traffic to use B
- Limited parking

DEPARTURE

- Preferred Rwy for take-off is 08/26.
- RNAV SIDs available, but ATC will often clear you to climb straight ahead to 3000' and then turn you to your first waypoint.

WEATHER

- Punta Cana experiences a tropical climate with a cool season Nov-Apr with low humidity and little precipitation. Hot season is May-Oct with higher humidity and frequent rainstorms.
- Hurricanes possible during Caribbean hurricane season (Jun-Nov). Punta Cana most at risk later in the season.
